

VIOLETATOM

Innovation, from software development to the mechanical design. This is Violet Atom. Our mission is to build robots, drones and automated systems using innovative technologies, according to the requirements of our customer.

SOFTWARE DEVELOPMENT

ABOUT OUR INFORMATION TECHNOLOGY DEPARTMENT

We have skilled developers and talented systems engineers. We have proven experience in machine learning, neural networks, computer vision, augmented reality and several other algorithms.

ELECTRONICS ENGINEERING

ABOUT OUR ELECTRONIC & ELECTRICAL ENGINEERING LABORATORY

Our staff design electronic components for robots, drones, industrial automation systems, home automation devices and much more.

MECHANICAL DESIGN

ABOUT OUR MECHANICAL ENGINEERING DEPARTMENT

Our mechanical designers have a strong experience in the automotive industry and industrial automation. We can build mechanical parts for robots, automated systems and almost every kind of vehicle.
